

Industrial-grade Shielded 10m Rear View Extension Cable typically used for smaller caravan, horse float, camper van or trailer applications.

Product Description

Industrial-grade Shielded 4-Pin DIN extension cables from DIG Options are the ideal choice when looking for a long lasting Rear View Camera Video/Audio/Power cable.

The industrial-grade aviation-style connectors have a locking screw which is designed for keeping dust and water away from the connectors while providing a very robust and secure connection.

This cable combines video, audio and power within the same wire and is designed to simplify the rear view camera installation process.

Ideal for connecting cameras to monitors in a range of applications for cars, buses, trucks, farm machinery, mining and much more.
